Art Unit: 2127

1. This final office action in response to paper number 4, Amendment A that was filed January 14, 2004. Claims 1-23 are presented for examination. Applicants' argument with respect to claims 20-23 has been fully considered but they are not deemed to be persuasive.
2. The text of those sections of Title 35, U.S. code not included in this office action can be found in a prior Office action.
3. Applicant's argument overcomes the rejection of claims 1-19 in the previous Office Action dated October 21, 2003. Claims 1-19 are allowed.
4. Claims 20-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gopal et al. (U.S. Pat. No. 5,491,817, hereinafter Gopal).

Gopal teaches of at least one client and at least one server. This is inherently taught by Gopal because, by definition a client is a process, program or task that request a service provided by another program called a server and this is taught by Gopal in col. 8, lines 6-22 (*application 200 receives user requests and Communicates with other Network elements, and The control processor 260 also controls a format processor 270 which receives information retrieved from local directories and formats the information, as illustratively shown in FIG. 15, to be sent to requesting users*).

multiple copies of a same object under different context (col. 7, lines 37-39, and col. 8, lines 6-23, *instead inputs known directory information about the same object in one context and requests information in another desired context*); and

a context manager adapted to manage the different context (col. 8, lines 6-23, the linking component manages the contexts).

a cache adapted to allow multiple copies of a same object to be cached under different context; and

While the reference of Gopal teaches of storing directory entries on a memory, he fails to explicitly teach of "a cache adapted to allow multiple copies of a same object to be cached under different context". However, using cache is commonly known in the art at the time the invention was made because cache is a special high speed storage mechanism, which can be either a reserved section of main memory or an independent high speed storage device to use the same

Art Unit: 2127

data over and over. Therefore, it would have been obvious for one ordinary skill in the art at the time the invention was made to use a part of the main memory as cache to use frequently used data to facilitate the manipulation of contexts by linking component.

Per claim 21-23, the system according to claim 20, wherein said context manager is a transaction manager, wherein said context manager is a transaction manager adapted to support lock-based, pessimistic concurrency control, wherein said context manager is a transaction manager adapted to support optimistic concurrency control (col. 6, lines 14-21, lines 26-33, users can access information in different context at the same time).

5. Applicant on page of his Remarks, second paragraph after the first partial paragraph argues:

With respect to claim 20, the Office Action has entirely failed to address any of its limitations, That is, the Office Action fails to address "at least one client," "at least one server," "a cache adapted to allow multiple copies of a same object to be cached under different contexts," and "a context manager adapted to manage the different contexts".

In response, it is submitted that, the overly broad limitations of claim 20 were addressed in the previous office action, however, Examiner addressing the limitations in claim 20 in a more detail and descriptive manner in this office action [section 4, above].

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

6,026,428, filed August 13, 1997, issued to Hutchinson et al.

5,893,912, filed August 13, 1997, issued to Freund et al.

6,591,357, filed February 26, 2001, issued to Mirsky.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a).

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY

PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE application has been amended as follows:

ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Maid A. Banankhah** whose voice telephone number is (703) 308-6903. A voice mail service is also available at this number.

All response sent to U.S. Mail should be mailed to:

**Commissioner of Patent and Trademarks**  
**Washington, D.C. 20231**

**Hand-delivered responses should be brought to Crystal Park Two, 2021 Crystal Drive, Arlington, VA, Six Floor (Receptionist).** All hand-delivered responses will be handled and entered by the docketing personnel. Please do not hand deliver responses to the Examiner.
